**THERMFLEX**

**SERIES: AI-14**

A unique development in hose technology.

Combining all the desired features -

- Excellent Flexibility at temperatures to -30°F
- Excellent Abrasion Resistance, Lightweight
- Smooth Rubber - like cover is non-marking and pinpricked
- Good Resistance to Oils, Detergents and Mild Chemicals
- Colour Coded for easy identification

**RECOMMENDED APPLICATIONS:**

- Pneumatic Tools
- Compressed Air Supply Lines
- Service Station Air Hose
- Roof Stapling Guns
- Air Drop Lines
- Transfer of Air, Water and Mild Chemicals

**TEMPERATURE RANGE:** -20°F to 150°F

**SINGLE JACKET MILL DISCHARGE HOSE**

**SERIES: WA-16**

**FEATURES & BENEFITS**

- 100% Polyester Single Jacket - water resistant cover will not rot, even if the hose is stored wet.
- Smooth Natural Rubber Tube - provides strength and flexibility. Hose may be rolled easily for storage.
- Good Cold Temperature Flexibility - -25°F to 185°F.
- Lightweight and Layflat - for ease of handling and storage.
- White Cover with Red Stripe - for easy identification.

**NOTE:** Not intended for use as a fire hose

**APPLICATIONS:** Heavy Duty Water Pump Discharge on construction sites etc.  
 Washdown service on ships, in mills and manufacturing plants.

ALL WEATHER SUCTION HOSE

**Kanaflex®** - 300 EPDM

**CONSTRUCTION:** Smooth bore EPDM rubber with Green external polyethylene helix.

**FEATURES:**

- Lightweight and flexible
- External helix provides for easy drag and good abrasion resistance
- Resistant to agricultural chemicals

**APPLICATIONS:**

- Construction dewatering
- Septic and cesspool cleaning
- Water and liquid handling in rental and agricultural industries
- Liquid manure

**TEMP. RANGE:** -40°F to 158°F

**Construction:**

- Core/Liner – Pure white PVC compound material, formulated with ingredients in compliance with applicable FDA<sup>2</sup> requirements, meets NSF<sup>1</sup> criteria and California Proposition 65<sup>3</sup>
- Reinforcement – High tensile strength yarn. Also has longitudinal yarns which reduces elongation under pressure
- Cover – Blue colour signifies a pure water line. High quality flexible PVC compound is uniquely blended to give excellent abrasion and weathering resistance.

**Features:**

- KC046-W, high purity NSF-61 certified core/liner material diminishes water quality concerns regarding surfaces in which potable water comes into contact.
- KC046-W core/liner is less porous than that of conventional rubber hoses commonly used and easier to flush out and keep clean.
- Silicone-free

- White core/liner and blue cover reduces tendency for algae growth in warm, sunny environments
- Extremely lightweight. 22-25% lighter than conventional rubber hose which reduces worker fatigue
- Hassle free and easier to use requiring less installation time than rigid pipe
- Strong and durable for construction site environments
- Heavy Duty construction to limit kinking in the hot summer sun
- Good abrasion resistance
- No bad taste or odor is left in the water that conventional rubber hose can leave

**General Applications:**

- Transfer of potable water
- Water purification systems
- Temporary municipal surface bypass potable water lines for municipal construction
- Water sampling

Service Temperature Range: -10°F (-23°C) to 150°F (+65°C)

**E.V.A. WEED SPRAY HOSE**

**SERIES: AG-03**

In addition to the agricultural spray hoses, we offer an E.V.A. (Ethyl Vinyl Acetate) weed spray hose with a working pressure of 250 P.S.I. It is made of a non-toxic compound of V.A. in polyethylene: This hose can be used for Monsanto's Pesticide, "lasso", anhydrous ammonia applications and for conveying beverages.

**COLOUR:** Clear

**REINFORCEMENT:** Polyester Yarn

CLEAR PVC FOOD SUCTION WITH HELIX WIRE (with Rated Working Pressures)

**COVER:** Smooth clear non-marking P.V.C.      **TEMP. RANGE:** 1/4" & 3/8" (-25°F to 150°F)  
**TUBE:** Smooth clear P.V.C.      1/2" to 2" (-25°F to 175°F)  
**REINFORCEMENT:** Spring steel wire helix.      **HEAVY WALL**

**APPLICATIONS:**

- Full Vacuum Lines
- Industrial Vacuum Pumps
- Food and Beverage Dispensing
- Air and Water Supply Lines
- Car Wash Applications
- Coolant Lines
- Air Breathing Lines
- Pneumatic Parts Transfer

**FEATURES:**

- Full Vacuum Rating
- Anti Kinking
- Anti Collapsible
- Non Toxic
- Full, clear, visual flow
- Glass smooth interior to reduce material build-up
- Ozone and Atmospheric Resistant
- Rated working pressures (see guide below)
- Chemical resistant (see guide)

"THE LIGHTWEIGHT CHAMP"

A premium quality, lightweight hose, ideal for Dry Material Handling - i.e. Crushed Rock, Sand, Gravel, Iron Ore, Grains, Coal Dust, etc.

**TEMP. RANGE:** -40°F to 158°F. Static dissipating.  
**LIGHTWEIGHT:** Up to 60% lighter than plied rubber hoses - easier to handle  
**EXTREMELY FLEXIBLE:** **Crush Resistant - Smooth Bore** - makes for faster and more efficient transfer of dry material.

## 180 MV SUCTION HOSE

The 180 MV is an abrasion-resistant, medium duty suction hose designed for many applications such as grain and roof vacuums. Constructed of SBR rubber with static dissipating carbon black and a rigid PVC helix.

**Lightweight...**up to 50% lighter than conventional rubber hose, so it's easier to handle and less expensive to transport.

**Economical...**initial cost is low and Kanaflex is almost maintenance-free, to save you money in the long run.

**Flexible...**lends itself to working in tight spaces. Easy handling even in large I.D.'s.

**Smooth Bore...**combined with smooth bending characteristics, makes for the fastest, most efficient transfer of materials.

**Static Dissipating...**needs no ground wire, no electrical shock (arcing), and no clogging in most applications. (Please consult factory for specific applications.) Sidewall constructed of abrasion resistant static dissipating SBR rubber.

### SPECIFICATION: 180 MV SUCTION HOSE

DRY MATERIAL HANDLING

SERIES:VA-UF1

POLYURETHANE LINED - ABRASION RESISTANT

**FEATURES**

**Smooth polyurethane Lining:** Resistant to abrasion and eliminates material build-up

**All Black HMW PVC Convuluted Cover:** Formulated with anti-static compound and low-temperature flexibility.

**TEMPERATURE RANGE:** -40°F to 150°F

**GENERAL APPLICATIONS:** Industrial vacuum; pneumatic conveying systems for power, pellets, or granular material; roof rock and fly ash collection; abrasive material transfer; sand/shot blast recovery line; grain handling.

(NOT RECOMMENDED FOR LIQUID HANDLING USE)

**STYLES AND SPECIFICATIONS**

**RUBBER WIRE DUCT**

A 'new' economical Rubber Ducting / Blower Hose with helix wire. Lightweight and flexible with a **temperature rating to 220°F**. Good abrasion resistance. **APPLICATIONS:** Saw dust, wood chips, grass/leaves etc. Also excellent for general factory air ducting and dust control. Also available with scuff guard wearstrip for extra abrasion resistance.

**NC-2**

The most popular air ducting for dust collection, light material handling and general factory application. Constructed of a double ply of Neoprene impregnated cotton, spiralwound on rust resistant carbon steel wire. Smooth interior surface, with no bare wires. **TEMPERATURE RANGE:** -40°F to 250°F.

**U-9 SILICONE**

Silicone rubber coated fiberglass fabric for higher **temperatures of -75°F to 500°F**. Lightweight. Maximum flexibility.

**L-9 SILICONE**

Similar to U-9, but having a silicone liner, silicone coated each side for smoother flow.

**VAC-U-FLEX H.D. SUPER**

Heavy duty vacuum hose with a spring helix wire cover is composed of reinforcing yarns between plies of PVC. **TEMPERATURE RANGE:** -20°F to 150°F

**CLEAR-TPU**

Polyurethane thermoplastic provides an abrasive resistant ducting with a clear construction. **TEMPERATURE RANGE:** -40°F to 200°F

**FLEXVENT S-LP-10**

Cover is flame retardant vinyl-coated woven fiberglass permanently bonded to a PVC coated spring steel wire helix. **TEMPERATURE RANGE:** to 250°F **APPLICATIONS:** Venting dry cleaning equipment; clean room air intake and exhaust ducts; venting undesirable odours.

**SERIES 150CL** *Kanaflex*

Tough enough...and light enough...to take it.

- Clear see-through PVC construction
- Extremely flexible
- Light weight
- No wire
- Smooth bore for increase flow

**Recommended Applications:**

- Leaf collecting - Dust control - Grass clippings - Air conditioning - Light abrasives - Ventillation ducting
- **Economical** initial cost is low, and Kanaflex is almost maintenance-free, to save you money in the long run.
- **Lightweight** easier to handle and less expensive to transport.
- **Clear Side Wall** for monitoring product flow.
- **Weatherproof** Kanaflex is highly resistant to temperature changes & deterioration by sun, ozone or mildew.
- **Extremely Flexible** lends itself to working in tight spaces.
- **Smooth Bore** combined with smooth bending characteristics, makes for the fastest, most efficient transfer of fluids.

**Temperature Range:** -20°F to 180°F (intermittent to 225°F) (PV) -40°F to 250°F (PN)  
**Construction:** One-ply polyester vinyl laminate expanded pitch with encapsulated wire helix and extruded polymer wearstrip (PV) or one-ply polyester neoprene coated (PN)  
**Standard Colors:** Yellow with black wearstrip  
**Standard Lengths:** 25'  
**Size Range:** 4" to 24"  
**Features:**

- Light weight (PV) • Heaviest duty of Max-Flyte Series (PN)
- Highly compressible for positive pressure movement for air, dust and fumes at lower temperature ranges (PV)
- Flame retardant to UL94V-0 rating
- Non-standard sizes and lengths available, please consult factory

SIZE	6" x 25'	8" x 25'	12"x 25'	18"x 25'
PART NO.	1PVEPW-6	1PVEPW-8	1PVEPW-12	1PVEPW-18
LIST PRICE	\$346.00	\$384.00	\$615.00	\$1011.00

End Finishes for 1PV-EP-HM, 1PN-EP-HM, Therma-Cool, TP-W

**Sewn Cuffs:** Two-pilies of polyester fabric sewn on to the ends.

**Standard Belted Cuffs:** For easy attachment to portable blowers. The belt is sewn around the cuff to insure quick and secure connection to most portable blowers.

**Ring Connectors:** Sewn into the ends of the hose to keep dust end open. Ring connectors interlock for quick connection of utility blower hoses.

**PORTABLE HEATER DUCTING - USED MAINLY ON DECLOET HEATERS**

**PART#: FSP-V-24-25**

**Flexaus! Springflex FSP-V**  
**Application:** For use in industrial grade air movement applications  
**Features:** Lightweight construction.  
 Highly compressible.  
 Low friction loss.  
 External abrasion wearstrip.  
 UL 94V-0 Listed.  
 Clampless connector-see insert.

**ID:** 24"      **LENGTH:** 25'      **LIST PRICE:** \$1167.00  
 Other ID's and lengths available

**CANVAS HEATER DUCTING**

**PART#: CANDUCT-12-12**

**Application:** With cold weather this dust delivers indirect fired preheated air from ground heating equipment to various temporary and permanent structures.

**Features:** 100% fire resistant material. Fiberglass liner provides heat protection from the heater unit, Tie straps built in to help compress for storage and transporting.

**ID:** 12"      **LENGTH:** 12'      **LIST PRICE:** \$279.00

Also available in 6" and 16" ID

**PAPERMILL WASHDOWN HOSE WITH BUILT ON NOZZLE**

This hose is manufactured in 50' lengths with an intergral built-on tapered **Rubber Nozzle**. Suitable for hot or cold water washdown service in paper mills etc.

- COVER:** Green abrasion resistant synthetic rubber
- REINFORCEMENT:** Multiple spirals of moisture resistant synthetic yarn
- TUBE:** Black synthetic heat resistant rubber

**SATURN - FIRE HOSE**

SINGLE JACKET RUBBER LINED

Meets or exceeds performance requirements of NFPA 1961, UL and FM.

- Approved for indoor and outdoor use.
- All synthetic, rot and mildew proof.
- Resistant to aging, ozone, UV-rays and extreme temperatures.
- Extra heavy jacket for abrasion resistance.
- Smooth rubber lining to reduce friction loss.
- Excellent adhesion to the lining after years of use.

**HOT WATER WASH-UP**

**SERIES: ST-01**  
STANDARD TYPE

A popular low pressure hose for wash-down and swilling jobs in creameries, packing houses and food processing plants. Its neat appearance and non-marking white cover makes it the ideal hose for use in all places where cleanliness and hygiene are essential. Not suitable for steam.

**COVER:** White, smooth, oil and grease resistant  
**REINFORCEMENT:** Layers of top quality tire cord

**TUBE:** Oil and heat resistant rubber  
**TEMP. RANGE:** (93°C) 200°F @ 50 PSI

SEE PAGE 64 FOR CHEMICAL CHART

"ALL CHEMICAL" is suitable for use with the chemicals listed below, and water solutions of these chemicals, at temperatures up to a maximum of 50°C and 100% concentration, unless otherwise specified. Exclusion from this list does not necessarily denote unsuitability.

Acetaldehyde	Chlorine Water 3%	Hydrogen Peroxide 30%	Potassium Cyanide
Acetic Acid 60%	Chloroacetic Acid*	Hydrogen Sulphide	Potassium Dichromate*
Acetone	Chloroacetone	Hypo	Potassium Hydroxide
Acetophenone	Chlorobromomethanethane*		Potassium Nitrate
Acetylene	Chromic Acid 30%	Iodine Solution	Potassium Permanganate*
Acrylonitrile	Chromic Acid Above 30% (Intermittent Use)	Isoamyl Alcohol	Potassium Salts
Allyl Alcohol*	Citric Acid	Isobutyl Acetate	Potassium Suphate
Aluminium Salts - Chloride	ChloroxCoconut Oil	Isobutyl Alcohol	Potassium Sulphite
Fluoride	Cobalt Nickel Plating Soln.*	Isobutylene*	Producer Gas
Hydroxide	Cod Liver Oil	Isopropanol	Propane Gas
Sulphate	Coke Oven Gas	Isopropyl Alcohol	Propane Liquid
Aluminium	Copper Arsenate	Iso Octane	Popyl Acetate
Ammonium - Bisulphate 50%	Copper Chloride	Isopropyl Acetate	Propyl Alcohol
Ammonium Chloride	Copper Cyanide		Propylene Dichloride*
Ammonium Hydroxide	Copper Nitrate	Jet Fuels	Propylene Glycol
Ammonium Metaphosphate	Copper Sulphate		Pyridine*
Ammonium Nitrate	Corn Oil	Lactic Acid 20°C	Pyrolineous Acid
Ammonium Persulphate*	Cottonseed Oil	Lactol*	
Ammonium Phos., Monobasic	Creosote Coal Tar*	Lard	Sea Water (Salt Water)
Ammonium Phosphate, Dibasic	Creosote Wood	Lead Acetate	Sewage
Ammonium Phosphate, Tribasic	Cresylic Acid*Cryolite 10%	Lead Arsenate	Silicone Emulsions
Ammonium Sulphate	Cyclohexane*	Lead Salts	Silver Salts
Ammonium Thiocyanate	Cyclohexanone*	Lead Sulphate	Soda Ash, Sodium Carbonate
Amyl Alcohol	Cyclohexanol	Linseed Oil	Sodium Acetate
Aniline	Cymene	Lithium Hydroxide	Sodium Bicarbonate
Aniline Dyes		Lithium Salts	Sodium Bisulphate
Animal Fats			Sodium Carbonate
Antifreeze	DDT & Kerosene	Magnesium Carbonate	Sodium Chlorate*
Antimony Chloride 50%	Decalin*	Magnesium Chloride	Sodium Chloride
Arsenic Acid	Dibutyl Ether	Magnesium Hydroxide	Sodium Cyanide
Astm Oil No 1	Dibutyl Phthalate	Magnesium Nitrate	Sodium Fluoride
Astm Oil No 2	Dibutyl Sebacate	Magnesium Salts	Sodium Dichromate*
Astm Oil No 3*	Diesel Oil*	Magnesium Sulphate	Sodium Ethoxide
	Diethylamine	Mangarese Salts	Sodium Hydroxide (Conc.)
Barium Salts - Carbonate	Diethylene Glycol	Mangarese Sulphate	Sodium Hypochlorite*
Chloride	Diethyl Ketone*	Mercuric Chloride	Sodium Metaphosphate
Hydroxide	Diethyl Phthalate	Mercuric Cyanide	Sodium Nitrate
Sulphate	Diethyl Sebacate	Mercurous Nitrate	Sodium Nitrite
Sulphide	Dimethyl Aniline*	Mercury Salts	Sodium Perborate*
Beet Sugar Liquors	Dimethyl Ether	Methanol	Sodium Phosphate, Monobasic
Benzaldehyde	Dimethyl Formamide*	Methyl Acetate	Sodium Phosphate, Dibasic
Benzene (Conditional at 20°C)	Dimethyl Phthalate	Methyl Acetoacetate	Sodium Phosphate, Tribasic
Benzene Sulphonic Acid	Dioxane	Methyl Alcohol	Sodium Sulphate
Bismuth Carbonate		Methylamine	Sodium Sulphide
Black Sulphate Liquor	Ethanolamine	Methyl Chloride*	Sodium Silicate
Blast Furnace Gas*	Ethyl Acetate	Methyl Ethyl Ketone*	Sodium Sulphite
Borax	Ethyl Alcohol	Methyl Isobutyl Ketone	Sodium Thiosulphate
Bordeaux Mixture	Ethyl Amine	Methyl Isopropyl Ketone*	Soybean Oil
Boric Acid	Ethyl Butyrate	Methyl Methacrylate 20°C	Stannic Chloride
Brake Fluid	Ethyl Cellulose		Stannous Chloride
Brine Saturated with Chlorine*	Ethyl Iodide*	Natural Gas, Dry	Stearic Acid*
Butane Gas	Ethyl Propyl Ether*	Natural Gas, Wet	Sugar (Liquid)
Butane Liquid	Ethylene Bromide*	Nickel Chloride	Sulphur Chloride*
Butanol (Butyl Alcohol)	Ethylene Chloride*	Nickel Nitrate	Sulphurous Acid 75%
Butyl Acetate		Nickel Plating Solution*	Sulphur Dioxide (Dry)*
Butyl Cellulosolve	Feran*	Nickel Salts	Sulphur Trioxide (Dry)*
Butyl Ether*	Ferric Chloride	Nickel Sulphate	Sulphuric Acid 75%
Butyl Stearate* (Satisf. @ 20°C)	Ferric & Ferrous Salts	Nitric Acid 60% 20°C	
	Fluoboric Acid 65%	Nitrobenzene*	
Calcium & Cadmium Salts	Fluosilicic Acid 50%	Nitropropane	Tallow
Bisulphate	Formaldehyde, Aqueous 37%	Nitrous Acid	Tannic Acid
Carbonate	Formic Acid	Octane	Tartaric Acid
Chlorate	Furfural	Oleic Acid*	Tetrachlorethane*
Chloride	Glucose	Oxalic Acid	Toluene (Toluol)*
Hydroxide	Glue	Oxygen	Triethanelamine Trichlorethylene
Hypochlorite*	Glycerine (Glycerol)	Palm Oil	Tung Oil
Sulphate	Green Sulphate Liquor	Palmitic Acid*	Urine
Cane Sugar Liquors	Hexaldehyde	Pentane Perchlorethylene	Urea
Carbolic Acid	Hexane	Petrolatum	
Carbon Dioxide Dry	Hydraulic Oil	Phenol*	Vegetable Oils
Carbon Dioxide Wet	Hydrobromic Acid 40%	Phosphoric Acid 85%*	Vinyl Chloride (Monomer)
Carbon Monoxide	Hydrochloric Acid (Conc.) 37%	Picric Acid - Water Soln.*	
Castor Oil	Hydrocyanic Acid 20%	Potassium Bicarbonate	Xylene (Xylol)*
Cellosolve Acetate	Hydrofluoric Acid 65%	Potassium Borate	
China Wood Oil (Conditional)	Hydrofluosilicic Acid	Potassium Bromide	Zinc Chloride
Chlorine Gas - Dry*	Hydrogen Gas	Potassium Carbonate	Zinc Salts
Chlorine Gas - Wet*		Potassium Chlorate*	Zinc Sulphate

**\* Conditional**

All chemical is not suitable for handling food quality products nor is it recommended for use with the following chemicals.

Many of the chemicals listed above would not normally be pumped at the maximum recommended temperatures. For example, solvents are rarely pumped at above ambient temperatures.

Chloroform	Fuming Sulphuric Acid
Chlorosulphonic Acid	Molten Picric Acid
Dichlorobenzene	Molten Sulphur
Fuming Nitric Acid	Molten tar

**HI-LIFE SANDBLAST**

**SERIES: MH-01**

Recommended for all abrasive blasting applications. The tube of this hose is made with the finest quality abrasion resistant rubber available.

**COVER:** Black abrasion resistant natural rubber, wrapped finish, perforated

**REINFORCEMENT:** high tensile fabric ply

**TUBE:** Abrasion resistant natural rubber, static-conductive

## THE CANADIAN NAME FOR A COMPLETE LINE OF BLAST CLEANING EQUIPMENT

- Heavy duty portable blasters
- Economy series
- Parts and accessories

- Reach in type cabinets with dust collectors
- High Pressure units
- Abrasives

- Custom design automated systems
- Shot peening equipments
- Blast room accessories
- Wet blast cabinets

**TWIN GAS**

WELDING HOSE

Recommended for all welding, brazing, and cutting operations. Meets RMA, CGA Type VD, Grade R (RM) (T) specifications.

**COVER:** Red for acetylene. Green for oxygen. High quality flame and oil resistant compound  
**REINFORCEMENT:** One rayon braid  
**TUBE:** Smooth inner surface for full flow

**RECOMMENDED INSPECTION:**

Used assemblies should be checked for obvious signs of stress or abuse before any operation; look for abrasion, cuts, couplings movement or leakage, exposure to chemicals, blistering or loose cover, exposed reinforcement, etc. Inspect all hoses at specific intervals. If the hose fails the visual inspection, it should be removed from service and replaced. Perforated hose should be examined carefully; decreased hose life can be caused from reinforcement degradation due to fluid permeation through the cover.

## SmoothFlex - Nominal Bore

### Smooth Bore PTFE Hose with Stainless Steel Braided Reinforcement

Designed for applications requiring a smooth bore flexible hose with the unexcelled corrosion resistance and sanitary properties of PTFE. This smooth bore hose is specified and used in an endless variety of applications where conditions of service are beyond the capabilities of rubber, synthetic or metal hose. The PTFE smooth bore I.D.'s minimize pressure drop. SmoothFlex Nominal Bore is available with a **standard** virgin PTFE or **optional** conductive carbon black PTFE liner for electrostatic dissipation.

### Specifications:

Our Part #	Dash Size	Actual I.D. (inch)	Average O.D. (inch)	Working Pressure	Min Burst Pressure	Min Bend Radius (inch)	List Price
T103	-3	.125	.250	3,000	12,000	2.0	\$ 5.55
T104	-4	.187	.312	3,000	12,000	2.0	\$ 5.50
T105	-5	.250	.375	3,000	12,000	3.0	\$ 6.52
T106	-6	.312	.446	2,500	10,000	4.0	\$ 7.39
T108	-8	.405	.549	2,000	8,000	5.1	\$ 8.37
T110	-10	.500	.648	1,750	7,000	6.6	\$ 9.60
T112	-12	.625	.773	1,500	6,000	7.7	\$14.94
T116	-16	.875	1.030	1,000	4,000	9.0	\$19.41

Temperature Range -65°F (-54°C) to +450°F (+232°C)

\* STYLE 316ST/ST AVAILABLE ON REQUEST

**OTHER STYLES OF FITTINGS AVAILABLE ON REQUEST!**

**RETRACTABLE HOSE REELS**

*THE NEXT GENERATION*

**HOT WATER**

MODEL: L8447

**OXY / ACET**

MODEL: L8463

**AIR**

MODEL: L8305

**AIR / WATER**

MODEL: L8435

**Durable Construction** - Made from high quality UV stabilized polypropylene.

**Built-in Handle** - Less assembly required, greater convenience.

**Free Standing Base** - Reel sets level on the ground for greater convenience & portability.

**Latching Mode Switch** - Choose either Free Run or Latching mode (Latch in 2' increments).

**Five Position Locking Bracket** - Rotate locking rod on bracket to lock reel at desired angle.

► **Broader line than before** - More hose length & hose I.D. options (Hose Lengths: 50' to 75'; Hose I.D. Range: 1/4", 3/8", 1/2" & 5/8")

► **Easy Hose Replacement** - A superior design allows hose replacement to be handled easily in the field.

**Included in the Hose Reel Package is  
A WALL AND OVERHEAD BRACKET MOUNT**

MODEL/PART NO.	DESCRIPTION	LIST PRICE \$ / EA.
L8305	3/8" x 50' Air Hose Reel	450.00
L8435	1/2" x 50' Air / Water	525.00
L8447	5/8" x 50' Hot Water	595.00
L8463	1/4" x 50' Twin Line Welding Hose Reel	795.00

**WARNING - Selection of Hose:** Selection of the proper hose for the application is essential to the proper operation and safe use of the hose and related equipment. Inadequate attention to selection of the hose for your application can result in serious bodily injury or property damage from spraying fluid or flying projectiles. In order to avoid serious bodily injury or property damage resulting from selection of the wrong hose, you should carefully review the information in this catalog.

**WARNING - Proper Selection of Hose Fitting:** Selection of the proper fittings for the hose and application is essential to the proper operation and safe use of the hose and related equipment. Inadequate attention to the selection of the fitting for your application can result in serious bodily injury or property damage resulting from spraying fluids or flying projectiles. In order to avoid serious bodily injury or property resulting from selection of the wrong fitting, you should carefully review the information in this catalog.

**WARNING - The following list of chemicals is offered as a guide to the chemical resistance properties of the tube material of the hoses shown. It should be used as a guide only, as the degree of resistance of any elastomer to a particular fluid depends upon such variables as temperature, concentration, pressure conditions, velocity of flow, duration of exposure, aeration, stability of the fluid, etc.**

## Chemical Compatibility Chart

The chart below shows the general characteristics of some of the common rubber compounds. Elastomers are mixed with various chemicals to provide a wide range of physical properties for specific service needs.

ASTM DESIGNATION	COMMON NAME	COMPOSITION	GENERAL PROPERTIES
CR	Neoprene	Chloroprene	<ul style="list-style-type: none"> <li>. Good abrasion</li> <li>. Good weathering resistance</li> <li>. Good oil resistance</li> <li>. Flame retarding</li> </ul>
NBR	Nitrile (Buna-N)	Acrylonitrile-butadiene	<ul style="list-style-type: none"> <li>. Excellent oil resistance</li> <li>. Moderate resistance to aromatics</li> </ul>
IR	Butyl	Isobutylene-isoprene	<ul style="list-style-type: none"> <li>. Excellent ozone resistance</li> <li>. Good resistance to fire resistant fluids</li> <li>. Good heat resistance</li> <li>. Low permeability</li> <li>. Poor resistance to petroleum fluids</li> </ul>
CIIR	Chlorinated Butyl	Chloro-isobutene-isoprene	<ul style="list-style-type: none"> <li>. Same as Butyl</li> </ul>
SBR	SBR	Styrene-butadiene	<ul style="list-style-type: none"> <li>. Good abrasion resistance</li> <li>. Poor resistance to petroleum fluids</li> </ul>
EPDM	EPDM	Ethylene-propylene diene terpolymer	<ul style="list-style-type: none"> <li>. Excellent ozone resistance</li> <li>. Good chemical resistance</li> <li>. Good temperature resistance</li> <li>. Poor resistance to petroleum fluids</li> </ul>
XLPE	Cross-Linked Polyethylene	Polyethylene & cross linking agents	<ul style="list-style-type: none"> <li>. Excellent chemical resistance</li> </ul>
PA	Nylon	Polymide	<ul style="list-style-type: none"> <li>. Good abrasion resistance</li> <li>. Good chemical resistance</li> <li>. Low coefficient of friction</li> </ul>
CSM	Hypalon	Chloro-sulfonated Polyethylene	<ul style="list-style-type: none"> <li>. Excellent ozone resistance</li> <li>. Good abrasion resistance</li> <li>. Good heat resistance</li> <li>. Fair petroleum qualities</li> </ul>
NR	Natural Rubber	Polyisoprene	<ul style="list-style-type: none"> <li>. Excellent abrasion resistance</li> <li>. Acid resistance</li> <li>. Not oil resistant</li> </ul>
V-NBR	Vinyl Nitrile	PVC/NBR	<ul style="list-style-type: none"> <li>. Good ozone resistance</li> <li>. Good resistance to animal fats &amp; oils</li> <li>. Good petroleum resistance</li> </ul>
UHMWPE	Ultra-high molecular weight polyethylene	Polyethylene	<ul style="list-style-type: none"> <li>. Excellent chemical resistance</li> <li>. Moderate heat resistance</li> <li>. FDA-accepted material</li> </ul>
CM	CPE	Chlorinated Polyethylene	<ul style="list-style-type: none"> <li>. Excellent ozone resistance</li> <li>. Excellent weathering resistance</li> <li>. Good abrasion resistance</li> <li>. Good heat resistance</li> <li>. Good resistance to petroleum oils</li> </ul>
XNBR	Carboxylated Nitrile	Carboxylated Acrylonitrile-butadiene	<ul style="list-style-type: none"> <li>. Excellent abrasion resistance</li> <li>. Excellent oil resistance</li> <li>. Excellent weather resistance</li> </ul>
PTFE	Teflon®	Polytetrafluoroethylene	<ul style="list-style-type: none"> <li>. Excellent temperature resistance</li> <li>. Excellent chemical resistance</li> <li>. FDA accepted material</li> <li>. Low Coefficient of friction for high flow rates and easy cleaning</li> <li>. Excellent resistance to thermocycling</li> </ul>
PVC	PVC	Polyvinylchloride	<ul style="list-style-type: none"> <li>. Resistant to many chemicals</li> <li>. Good Flexibility</li> </ul>

## STEAM HOSE

### STEAM - ITS EFFECTS ON HOSE

"The hose must be faulty" is the usual reaction when steam hose fails in service, especially when, on the same application, the same type of hose has given satisfactory service.

Explaining why can be very difficult, but experience has shown that such examples of sudden failure are rarely due to defective hose. In most cases, failure can be the result of changing conditions of steam - a temporary condition of superheated steam in a saturated steam line can quickly deteriorate the lining of a steam hose which can either harden or soften, and cause failure.

To understand the problem let us start at the beginning. One of the first points is steam is an invisible gas and cannot be seen. What is seen issuing from the spout of a boiling kettle is not steam, but water vapour.

The temperature at which water boils depends upon the vessel containing the water. At normal atmospheric pressure, water boils at temperature of 100 degrees celsius. As more heat is added steam is generated but the water remains at the same temperature. Under these conditions moisture can be present in the steam which is known as "**wet saturated steam**" or simply **wet steam**.

As more heat is added all the water will be converted into steam which is known as **dry saturated steam** - still at atmospheric pressure and with a temperature of 100 degrees celsius.

If even more heat is added the temperature of the dry saturated steam will be increased and is known as **superheated steam** or **dry steam**. The word 'superheated' is used because its temperature is higher than that at which the water boils. This process does not conform to an invariable pressure / temperature relationship, as applies in the generation of saturated steam and it is possible for superheated steam to exist at a wide range of temperatures in relation to a particular pressure. But steam is almost always generated, and carried, at higher than atmospheric pressures and we know that the effect of increasing the pressure on the water is to increase its boiling point. For example at gauge pressure of 70 P.S.I. it is 158 degrees Celsius and at 150 P.S.I., 185 degrees Celsius.

- In the chart to the right, the black line represents the temperature at which water boils, or at which steam is generated.
- Consequently any point on this line represents **saturated steam** - which may be completely free of unvapourized particles of water, known as 'dry', or carry such particles as 'wet'.
- Any point in the zone below the line represents hot water.
- Any point in the zone above the line represent **superheated steam**.

#### MAINTENANCE OF STEAM HOSE

- 1) Periodic inspection of hose should include looking for cover blisters and lumps.
- 2) Check for kinked areas that could damage hose.
- 3) Drain hose after each use to avoid tube damage before hose is put back in operation, to avoid "popcorn" of the tube.
- 4) Check tightness of clamp bolts after each use.
- 5) Check to see if clamp halves are touching. If they do, recouple hose with smaller clamps to insure proper tightness or grip around hose.
- 6) Do not store hose over hooks.
- 7) Steam hose lying on metal racks or installed around steel piping will dry out the hose, causing tube and cover cracking.
- 8) For service in sub-zero application, use only Chlorobutyl hose.
